

Dinesh Upadhyay

MERN Stack Developer | React.js • Node.js • Express.js • MongoDB

+91-7239962436 | dineshupadhyay666@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

MERN Stack Developer with 1+ year of experience shipping full-stack features across an SDE internship and a digital agency role — building **React.js** and **Node.js** applications for real client and production use. Designs and ships **REST APIs**, **JWT-based authentication**, and **MongoDB**-backed data models end-to-end, from schema to deployment.

EXPERIENCE

Software Development Engineer (SDE) Intern — Bluestock Fintech

Mar 2026 – Apr 2026

Remote | Reported to Yash Kale

- Built and shipped user-facing features and backend modules with **React.js** and **Node.js**, working in an **Agile** sprint cycle alongside the core engineering team.
- Resolved production and staging bugs spanning frontend and backend, improving release stability ahead of feature rollouts.
- Built and integrated **REST API** endpoints supporting core application features, with changes reviewed through team **code reviews**.

MERN Stack Developer — Visual Vibe (Digital Agency)

May 2025 – Mar 2026

Remote | Reported to Khushbu Joshi, CEO

- Built responsive **React.js** frontend interfaces across multiple client websites, translating **UI/UX** designs into production-ready pages.
- Integrated client-facing frontends with **REST APIs** and third-party services, partnering with backend developers to ship features on client timelines.
- Debugged and optimized client codebases for **performance**, addressing rendering and load-time issues flagged during QA.

PROJECTS

Signalist — AI-Powered Stock Analysis Platform

2026

Next.js, TypeScript, MongoDB, Finnhub API, TradingView Widgets | [Live Demo](#) | [GitHub](#)

- Built a full-stack stock analysis platform in **Next.js** and **TypeScript**, delivering real-time market data, stock tracking, and portfolio monitoring.
- Integrated **Finnhub API** and **TradingView** widgets for live price feeds and interactive charts, adding retry logic to handle third-party rate limits.
- Designed a **MongoDB** schema for watchlists and portfolios, adding **indexing** to speed up dashboard queries.
- Implemented **JWT-based authentication** and protected API routes, restricting personalized data to authorized users only.

Ace Fitness Club — Gym Management System

2026

MERN Stack, React.js, Node.js, MongoDB | [Live Demo](#) | [GitHub](#)

- Built a full-stack gym management system covering member registration, attendance, and subscriptions for gym staff and trainers.
- Implemented **role-based authentication** (Admin/Trainer/Member) with distinct dashboards and permission levels for each role.
- Designed **REST APIs** and a **normalized MongoDB** schema for membership, trainer, and payment data, adding **input validation** to block malformed records.

TECHNICAL SKILLS

- Languages: **JavaScript (ES6+)**, **TypeScript**, Python, C++
- Frontend: **React.js**, **Next.js**, **Redux**, Tailwind CSS, HTML5, CSS3, **Responsive Web Design**
- Backend: **Node.js**, **Express.js**, **REST API Design**, **JWT Authentication**, Clerk Authentication
- Databases: **MongoDB** (Schema Design, Aggregation, **Indexing**), PostgreSQL, MySQL
- Tools: **Docker**, **Git**, **GitHub**, Postman, **GitHub Actions** (CI/CD basics), Vercel, Render

EDUCATION

Bachelor of Computer Applications (BCA)

Jul 2022 – Jun 2025

Engineering College, Bikaner, Rajasthan
